Summary

AI / Research Data Analyst with 3+ years of experience turning unstructured text into validated, decision-ready metrics using LLMs. Experienced in prompt schema design, precision/recall validation, A/B-style experimentation, and Python/SQL analytics to connect AI insights to business outcomes.

Technical Skills

AI Agents: Agentic Architectures, Planning & Reasoning, Memory Systems, Tool Use, Fault Recovery, Multi-Step Workflows, Guardrails, Cache

Analytics: PostgreSQL, Snowflake, MongoDB, AWS (S3, RDS, Textract), Power BI, Tableau, Data Visualization

AI/ML: LlamaIndex, LangChain, LLMs (GPT, Claude, Gemini), RAG Pipelines, NLP, Prompt Engineering, ChromaDB, Milvus, Pinecone, A/B testing

Language & DevOps: Python, SQL, JavaScript/TypeScript, Docker, Kubernetes, CI/CD, AWS, Git, REST APIs, ETL

Libraries: TensorFlow, Keras, PyTorch, CUDA, OpenCV, Sklearn, Pandas, NumPy

Work Experience

AI Developer, Fidelity Investments | Boston, MA

Jan 2025 – Present

- Built **AI-powered Expense Ratio Anomaly Detection System** that auto-extracts data from 500+ fund PDFs monthly, generating KRIs and flagging non-compliant funds reducing manual review time by 40+ hours/month.
- Architected **production RAG pipeline** integrating 10,000+ fund documents into vector database, achieving 94% retrieval accuracy; now serving as core infrastructure for fund compliance queries
- Designed and **evaluated LLM model** variants using controlled **A/B-style experiments**, **benchmarking** reasoning quality and measuring downstream business impact before standardizing prompt definitions.
- Partnered with **VP of Risk** and **CRO** on AI implementation strategy, presenting GenAI roadmap and strategic recommendations to C-suite stakeholders.
- Performed stratified **sampling and manual validation** of LLM outputs, calculating **precision and recall** to ensure conversational metrics were statistically reliable before production deployment.
- **Automated** SOX certification controls for Asset Management Risk team across 10 business units, maintaining 100% compliance rate for 2 consecutive audit cycles.

Data Engineer, Deloitte LLP

Oct 2022 – Aug 2023

- Engineered **RLHF training pipeline** for **Amazon's AI chatbot** at scale, building tone classification and contextual response systems and improved response quality scores by 23%.
- Designed **query classification architecture** handling 10,000+ daily coding problem interactions, reducing response errors through ML-powered intent detection and continuous feedback optimization.

Data Analyst Intern, StayVista

Feb 2022 – Oct 2022

- Built automated reporting dashboards and Excel-based tools, achieving 20% operational efficiency improvement.
- Delivered data-driven insights to leadership, supporting strategic decision-making in fast-paced startup environment.

Projects

Multi-Modal RAG System

GitHub

- Architected multi-modal retrieval system with FastAPI backend, implementing hybrid search for document queries
- Deployed containerized ML inference pipeline using Docker and Kubernetes on AWS infrastructure
- Designed automated data ingestion with Airflow, processing documents into Snowflake for downstream analysis

Traffic Safety Data Warehouse & Analytics | Talend, SQL Server, Alteryx, Tableau

- Engineered automated ETL pipeline using Talend to consolidate 3M+ records from NYC, Chicago, and Austin into centralized Azure SQL data warehouse.
- Conducted data profiling using Alteryx to identify null values and anomalies across 50+ source columns, ensuring data quality and consistency.
- Built interactive Tableau & Power BI dashboards visualizing safety metrics, enabling recommendations.

VerifAI: Gen AI Security Application | Python, Computer Vision, LLMs, Docker

- Developed Gen AI-driven security tool for biometric verification of AI agents conducting financial transactions.
- Integrated AI solution with existing infrastructure, implementing real-time deepfake detection and identity verification workflows.

Education

Northeastern University

Sept 2023 – Dec 2025

M.S. in Information Systems

University of Mumbai

Sept 2018 – Aug 2022

B.E. in Engineering
